DIY Carport Kits

February 2019

DIY CARPORT KITS

What are our DIY Carport Kits?

DIY Carport Kits are made from a lightweight and strong aluminium structure, with polycarbonate roofing.

The kits contain everything needed to build the carport together in one weekend.

DIY Carport Kits come in both single and double carport sizes. Kit size can be adapted to any size as required.

Features of the DIY Carport Kits

- ✓ Powder coated high strength 6063-T5 Aluminium alloy frame is corrosion resistant
- ✓ Polycarbonate sunshade roof is highly impact resistant
- ✓ Assists in providing shade and temperature control (R-value of 0.89)
- ✓ Convenient gutter system is built into the carport (down pipes can easily be attached)
- ✓ Blocks 98% of UV rays to protect your vehicle
- ✓ Strong wind resistance (against winds of up to 42m/s)
- ✓ Easy to install
- ✓ Available in a range of colours

DIY Carport Kits contain

- Frame (6063-T5 Aluminium Alloy)
- Sunshade Roof (3mm Polycarbonate PC Endurance board)
- Fastening Parts (304 Stainless Steel & EPDM rubber seals)
