Polycarbonate

What is polycarbonate?

WPC decking stands for Wood Plastic Composite decking and is a modern alternative to traditional timber. The plastic used in our WPC decking is recycled timber and recycled plastics, namely high density polyethylene so is environmentally friendly. It looks and feels like natural timber decking but its composition gives it several benefits over traditional timber decking:

- ✓ Termite resistant
- ✓ Rot, decay, mould, stain and mildew resistant
- ✓ No oiling or maintenance work required over the life of the decking
- ✓ Weather and UV resistant
- ✓ Splinter, cup and warp resistant
- ✓ Easy D.I.Y. concealed clip installation system
- ✓ 10 year limited warrant

Colour Selection

	Clear 	Cream 	Opal 	Bronze 	Grey 
Light Transmission	93%	49%	43%	38%	19%
Heat Reduction	0%	52%	62%	33%	47%
