# INSULATED EPS ROOF PANELS

## What are insulated EPS roof panels used for?

EPS roof panels are insulated roofing panels which incorporates roof, insulation and ceiling, making it a unique 3-in-1 roofing system. It provides an attractive, internal off-white colored steel lining that is maintenance free.

## Benefits of insulated EPS panels:

- ✓ Innovative “Seam Look” system eliminates unsightly joints
- ✓ Easy to install
- ✓ Each roof panel spans up to 5m long unsupported
- ✓ Ideal for patio enclosures and carports
- ✓ Easy cable access and safe electrical ducts
- ✓ Available in Trimdek roofing profile

## Fixing Recommendations for Roof Panels

For the insulated roofing profile fasten through each crest:

### Fixing to Steel

Crest fixing only - one fixing per crest

50mm panel - 14-10x115 hex head screw

75mm panel - 14-10x135 hex head screw

### Fixing to Timber

Crest fixing only - one fixing per crest

50mm panel - 14-10x115 hex head screw

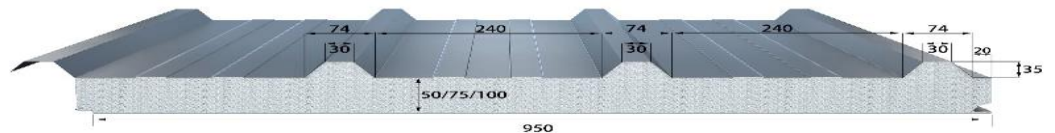

75mm panel - 14-10x135 hex head screw
