# Insulated EPS Wall Panels

---

# INSULATED EPS WALL PANELS

## What are insulated EPS wall panels used for?

EPS wall panels are insulated sandwich panels made up of two steel faces bonded to an expanded polystyrene insulating core. It's a unique light, cost-effective construction material used for both free standing and load bearing panels.

## Benefits of insulated EPS panels:

- ✓ Innovative "Seam Look" system eliminates unsightly joints
- ✓ Easy to install
- ✓ Ideal for patio enclosures and carports
- ✓ Easy cable access and safe electrical ducts

## Fixing Recommendations for Wall Panels

### Fixing to Steel

Crest fixing only - one fixing per crest

50mm panel - 12-14x68mm hex head screw

75mm panel - 14-20x135mm hex head screw
